### AUSTRIA.

TREATMENT OF AMERICAN CITIZENS. rm Our Own Correspondent.

VIENNA, Monday, March 6, 1854. In one of my previous letters I mentioned that the metrian Government had refused the exequatur to Mr. binson, U. S. Consul for Trieste. Such was actually te case. The affair attracted considerable attention Nicona and was talked of on 'Change. The result lows that the charges brought against him of having apressed political opinions not agreeable to the Ausfan authorities, were unfounded. I learn that the Germment has completely reversed its decision and m granted him the usual erequatur, in consequence of senewed application from the American Minister at Vienna.

I notice in the American journals grave and uncalled ir charges against Mr. Jackson, for having failed to afend the rights of an American citizen in Austria. to Rev. Mr. Richmond. The source from which the darges came should have rendered them suspicious. To have an American Minister thus arraigned before the ablic by a meddlesome English subject is enough to the every citizen of the republic indignant. I have ploubt that the publication of the correspondence mering to Mr. Richmond will place Mr. Jackson right a the estimation of the American public. The facts of the case are not unknown in Vienna. I have taken some trouble to inquire into the same and approve o the course of our Minister as fully as I condemn that of Mr. Richmond and Mr. Drinkwater. There is no hundation whatever for the charges preferred by the latter against Mr. Jackson. The Rev. Mr. Richmond by his singular indiscretion involved himself in difficulfee with the Austrian police. I do not cast censure the with the Austrian police. I do not cast censure a the revered gentleman, for it is generally believed it parsons acquainted with the circumstances, that he use not perfectly sane. It is not too much to say that feth of them were ambitious to acquire a newspaper sputation, to which no road is so direct as a Quixotic accounter with the Austrian police.

End I made use of such expressions as Mr. Richard employed, I would have been incarcerated at eace, and could have blamed only my own imprudence. In no part of the Empire is the police more vigilant than in Vienna, and no class of persons are so closely

than in Vienna, and no class of persons are so closely vatched as the correspondents of foreign journals. No cae, I am certain, can accuse me of having ever written in an Austrian sense, yet thus far I have not been increased, but on the other hand, have been treated seen politics by the policy in A. sore politely by the police in Austria than in any ofter kingdom on the Centineut. I failed to receive a passport from the State Department, and from want of time was compelled to take one from the Mayor of Kew-York. It passed well enough on the Rhine and in North Germany, where carrying a passport is a mere femality, but the Austrian authorities would not re-ceive it, and I was compelled to return to Dresden, and want for a new passport from the Austrian Win and wait for a new passport from the American Min-mer at Berlin, which came in the course of a week. The American Minister also wrote me that he was perfectly surprised that the Mayor of New-York dould assume the right of furnishing travelers with sports, to which no Minister or agent in Europe is beand to give the least value. After that I experienced no trouble whatever. Travelers who expert to cross the Austrian frontiers will do well to har in mind that the Austrian police will receive ach passports only as have been given by the State Department, and that no foreigner can enter the Em pire without having previously obtained the rise of an autrian Minister. The political condition of the Emste renders both of those regulations necessary. There is something in this that is at first annoying to an American, but in my opinion, if he shows that respect to the authorities which every traveler is bound to dow, he will be treated with respect, if not with unual consideration. That at least has been my experience, nor have I ever met with a case to the con-

Nothing, however, is so easy as to embroil ones self th the police, and thus give occasion for complaint winst the American Minister for not having come mptly to the rescue. The Austrian Government it is peculiar views upon the subject of allegiance.
it must also justify its course to a certain extent athe estimation of its subjects, but the triding punment which was inflicted upon Taussig, who pro the end to be an Austrian citizen, and the grant-of the exequator to the U. S. Consul at Trieste, her having once refused the same, show that the de-Instrations thus made were a mere sham to cover the imiliation which the Government experienced in the e of Martin Koszta. While upon this subject I canrefrain from saying in reference to the American Apresentation abroad, every person knows, or ought hand the subject demands the immediate attenof the Government. Every petty kingdom and minipality in Europe manages to have itself respect-bly represented at the neighboring Courts, and why country, which may now be set down as the "forc-tost land in the world," and which in two decennas will far outstrip the strongest power in Europe, and be respresented in so parsimonious a manner, is refectly incomprehensible. Our Minsters and Charges not have a salary sufficient to support even, in these to be a salary sufficient to support even, in these salary sufficients are salary sufficient to support even, in these salary sufficients are salary sufficient to support even, in these salary sufficients are salary sufficients and salary sufficient to support even, in these salary sufficients are salary sufficient to support even, in these salary sufficients are salary sufficient to support even, in these salary sufficients are salary sufficients. Pled to bring up the rear of the Diplomatic Corps at cost every Court in Europe. To return the civilistion unless the latter intreuch upon their private unes. This fact is here well known, and Europeans anot neglect the occasion to cast a sneer at Am ditutions. There are innumerable reasons why our inisters should be better paid. The post at Vienna in several other places, should also be raised to a ther rank. It is mainly through our Foreign Represtation that we can expect to give Europeans a just of our political institutions; but the fact tour Representation stands on so slender a basis, alis for the reason above mentioned, so little estated in the reason above mentioned, so little estated in the reason above mentioned in the inmed by Europeans in general, with the left wing ence which it ought to exert.

### HAVANA.

CASE OF THE BLACK WARRIOR. From Our Own Correspondent.

HAVANA, Tuesday, March 21, 1854. To answer the first question that the readers of your columns will mentally ask, in searching for your Havana correspondence. I will satisfy them as far I can, by giving all the news I am able in relation to the case of the now famous Black Warrior.

In the first place, unbiased by any unworthy feelings, and after viewing the affair in the most dispassionate manner; in my mind, it has been an unpardonable outrage, committed without any provocation. Had there been any snouggling or any attempt to defraud the Government, I should dismiss the case in a few words, but on the part of the agents of the vessel, there was no intention to do more than they had been allowed to do from the commencement of the vessel's veyages to our port; therefore on all bands the con-duct is declared to be most arbitrary and unwarranted. The seizure of the British steamers in your ports has been mentioned by the interested friends of the Span-iarcs who have desired to justify them, but permit me to say that there is no room for comparison between any case of those steamers and this of the "Black

The fact is, that you might as well compare these cases as compare the law and regulations of the ports of the United States, France and Great Britain with those of Africa and such semi barbaric parts. To say that there is law in Havana is almost ridiculous, as merely the will of our Governor is regarded in cases to

merely the will of our Governor is regarded in cases to which his attention is called. In most cases, Draco is consulted, and, if report be true, one of Drazz's pages was influential in the steps taken by Peruela at first in the affair of the Biack Warrior.

In regard to our Custom-House and its regulations, there is much to complain of. First samighing has been allowed to a great extent; secondly, the officers employed in examination are men without the proper knowledge or ability for the office; thirdly, through this defect, the honorable merchant is often charged enormous duties, while the briber often gets off with enormous duties, while the briber often gets off with the payment of a trifle; fourthly, our goods are often kept from us a full month in the Customs before they can be exemined, causing loss of interest, and opportu-nities of selling pass: fifthly, perishable goods are often sllowed to remain on board of vessels, as the permits to land are often kept back for various reasons, against all

The Black Warrior was given up to the Captain on Mendry afterneon, after he had paid to the Government \$6,600. There was no trial in the case, but the consignees attending to the interests of the owners, thought it best to get back the heat, and trust to their own Government for redress. The vessel is reported to be in a sad state of filth. The touch of the Spaniard has polluted her. The damages must be very great, and there must also be many more sufferers than the idle would imagine. I hope the Government may take up the business in right good earnest. It is no

common case. To everlook it, would be to encourage aggressions from ignorant barbarians.

Some days since I was credibly informed that 680 negroes had been landed near Trinidad, and that they had been captured by Government, or rather by an efficer with his company, through a mistake probably, it is said that Morales de Rada, the Governor of th as it is said that Morales de Rada, the Governor of the Department, had pocketed 1,000 ounces of gold for the landing of these negroes. It is reported that 600 more have been landed, which have not been captured, so should another cargo be safely got on shore, the business will pay well still. It is much better than the lotters, fare or hazard. A negro the contract the lottery, faro, or hazard. A negro that costs \$20 in Airica, here sells for \$500.

I find that Brigadier José Macias has been absolved from all participation in negro-landing in the district of Cienfueges. So it is with all these Spanish worthies who do evil. The Government always finds them Saints when the sin is not against the Government Now, probably the guilt of this fellow was very strong, so much so that witnesses appeared against him: but where there is no trial by jury, the wishes of the Government must carry the day. That there were witnesses, is conclusive proof that the fellow was guilty, for in this country no one would appear to accuse a Spanish Governor without good proof. The decument in relation to this is as follows:
MILITARY SECRETARY'S OFFICE.

MILITARY SECRETARY'S OFFICE.

In the criminal case against the Brigadier of Infantry.
Jose Mucias, Governor that was of Cientueges, accused of abuse in the exercise of his clice, sentence has been pronounced, by which said chief is absolved from all charges against him; and it is ordered that the Judges shall pay the costs and be suspended, not having conducted the trial according to law; and fines and imprisonment shall be imposed on the Notary and six witnesses who figure in the proceedings.

These Governors cannot do wrong. Even a common Commissary has nothing to fear, if he only commits his outrages upon the public. The Government, in such cases, always acquits its servants.

Probably you have heard or read that two of our old Governors and Captains Generals have lately been struck off the army list in Spain—O'Donnell and Jose de Conchs. The latter, you are aware, garroted Lopez

de Concha. The latter, you are aware, garroted Lopez wishing to steal this little jewel from the crown of Isabel: and now be himself is an exile for meditating the seizure of the whole diadem. What a strange people these Spaniards are! The loyal Governor of to-day is a traiter to morrow o-day is a traiter to morrow.

Havara, Taseday, March 21, 1854.

The decision of the tribunal before whom the case of the steenship Black Warrier was brought, after the science of the vessel and confiscation and discharge of her cargo, was as follows: The consecution of the colton and a fine of \$65,000 on the vessel. This tribunal is a one-sidel affair, as neither the steamer's agents or captain were allowed to be present. The decree of this Court was auruilled by the Captain General, as Super in enfents who ordered that the ship and cargo should be given up and a fine of \$6,000 imposed instead. He also directed that a bond should be given for the amount of the fine by the agents to the Collector, subject to the decision of the Queen advising that a memorial be prepared and sent to ber, and promising the law it promptly forwarded, and he had no doubt it would be remitted altogether. A bond for the \$6,000 was accordingly made, guaranteed by one of the most substantial houses in this city. This was refused by the Collector, and he also refused to allow any American house to become bondsmen. The money was then poid under protest.

DEFADRIL OCCUBERNCE - The Buffulo Republic learns DEFAURT OCCURRENCE—The Bugulo Republic learns that a few days since a bouse in the town of Northbush, in Eric County, was entirely destroyed by fire and two children burned to death. The father and mother of the family, where names were Muck, went out in the evening to a neighbor house to see a sick person, leaving at home a servant girl and three little children seleep. Shortly after their deperture the girl went to bed, thinking the parents would soon return. On going to bed she placed a lighted tailow candle on the rail of the bed where the children were electing. She was soon asleep, and in the children were electing. She was soon as leep, and in the meantime the candle had burned down, the grease running in every direction, and, it is supposed, set fire to the bedothing. The girl was awakened by the flames, and jumped up and

took one of the children out of the room and placed it in safety; but when she returned to get the other two, the finnes had so spread as to render it impossible to reach them, and in her attempt to rescue them, her own clothing took fire, and she was so badly burned that her recovery is doubtful. The house was burned to the ground, and in the ashes scarce a vestige of the remains of the two chil-dren could be found. dren could be found.

Destructive Hallstorm.—Our place was visited on Wednesday, about 3 o'clock P. M., with one of the most terrific and destructive hallstorms we ever beheld. The storm came up from the north west, and appeared at first to be culy a gentle shower; but soon the hall came down, accompanied with wind, the hallstones increased in size, and feel in such quantities and with such force as to completely demelish all the windows in the town that were exposed. It is supposed that it will take \$1,000 to repair the windows alone. Much damage was done otherwise to buildings and furniture. After the glass was broken out the starm continued to rage, filling the houses, stores and shops with rain and halistones, wetting goods of every description, deepoilling furniture, &c. Several porsons were out in the storm, and were braised severely. The large brick quarters for officers and soldiers in the fort, covered with slate, were injured very much, the halistones being so large as to beat the state to pieces. Early vegetables were entirely ruined, and the damage to fruit treas very great. [Fort Smith (Arkansas) Herald, 11th.
